

Stack $\begin{cases} \rightarrow \text{array} \\ \rightarrow \text{Link} \end{cases}$

queue $\begin{cases} \rightarrow \text{array} \\ \rightarrow \text{L.L} \end{cases}$

Binary search tree $\Rightarrow$ List ✓
 $\Rightarrow$ Array ✓

$$\text{Left child} = 2 \times \text{index} + 1$$

$$\text{Right child} = 2 \times \text{index} + 2$$

sorted form

root 1

root 2

20	40	50	70	80	90	100
----	----	----	----	----	----	-----

30	60	70	80	95	100	120
----	----	----	----	----	-----	-----

70	80	100
----	----	-----

answer

Stack $\rightarrow$ inorder

L N R

Sto
root = null

(1) root $\rightarrow$ point root $\rightarrow$ stack
clearly, uske left mein
remove krdo

(2) if root is null,
stack ke top ko
print kro, uske
right mein chle jao

60 80 100 ⇒ answer to part a
